Like our TCAS II/ACAS II systems which account for more than 10,000 installations flying on 325 aircraft types, the compact CAS 66A works by interrogating the ATC transponders of other aircraft in flight. The CAS 66A then processes this information and displays the positions of surrounding aircraft to the pilot.

There is no difference between these 2 models referenced in various Honeywell publications. The PS-578A is referenced in the installation manuals for the CAS-67A TCAS and MST-67A Transponder. The dataplate for the control also indicates PS-578A. Some Honeywell paperwork for the control references only PS-578 for some reason.
