I have a 16HP twin cylinder Onan that misses sporadically, and only on one cylinder...when it runs right, its runs good. I thought bad gas initially, but it should miss on both cylinders if that was the case. Adding fresh gas did seem to help, but when I started it tonight it missed like it did before.

The PointSaver will work perfectly on Onan twin-cylinder engines. Just be sure the primary resistance of the ignition coil is above 3.0 ohms. This is determined by measuring across the (+) and (-) terminals with an ohm meter. You are correct on the tachometer - only works on single cylinder Kohler engines.

## **Electronic ignition conversion for Onan and Kohler engines**

Onan recommends Valve adjustment and de-carbon be done every 500 hours. If you don't want to do the valves, at least clean the crud out. This is an important step to follow because it constricts the flow of air around the engine and cause the rear cylinder to overheat. Also if after changing the oil the rubber ring that inserts on the outside ...
