Hot Topics related to Growth of Cities and Productivity 5. Agglomeration Economies (a hot topic since 20 years!) What types of agglomeration forces facilitate strong economic growth in cities (e.g., specialization, competition, diversification)? What are the benefits and costs of agglomerations?

## **10 Hot Topics in Research v02 - UZH**

The LightChEC research program is structured in seven interdisciplinary research topics, which are each lead by a different research group: Photocatalytic Water Reduction WRC and Photosensitizers Lead by Prof. Roger Alberto.

## **UZH - URPP LightChEC - Research**

Research Topics: Autosomal dominant polycystic kidney disease (ADPKD) is the most common hereditary cause of end-stage renal disease. Mutations in the genes encoding for polycystin-1 (PKD1) or polycystin-2 (PKD2) lead to alterations of various signalling cascades in tubular epithelial cells and cause the cystic disease.

Globalization, climate change and mobile information societies are at the heart of research of Geographers at the University of Zurich.

## **UZH - Department of Geography - Research**

Research Focus: GABAB receptors control neuronal excitability by mediating slow inhibitory neurotransmission. They are involved in virtually all main brain functions and have been implicated in numerous neurological disorders making them attractive drug targets.

## **Molecular and Cellular Neuroscience - UZH**

Topics range from human physiology to cancer biology, stem cells, genomic medicine and laboratory techniques. They also include transferable skills like statistics, project management for research, scientific writing and career planning. The PhD program organizes an annual retreat for scientific exchange and networking among students.

Deficit/Hyperactivity Disorder (ADHD), aggression and Dyslexia.

## **UZH - Neuroscience Center Zurich - Cognitive Neuroscience**

Research. We develop neuromorphic hardware, network models, and algorithms aimed at mimicing and understanding the computation underlying biological sensors and brain processing. This research is within the field of neuromorphic engineering, a field that is inspired by the way our brain computes.

## **Research - Sensors Research Group INI - UZH**

Our research activities include the method development to assess water in the soil-vegetation-atmosphere system and understand the role of vegetation functioning for water cycle dynamics. We develop new fluorescence spectroscopy based approaches to complement available remote sensing observations and contribute advancing aquatic research.
