Citation. Tabachnick, B. G., & Fidell, L. S. (2007). Using multivariate statistics (5th ed.). Allyn & Bacon/Pearson Education. Abstract. Using Multivariate Statistics provides advanced students with a timely statistical and multivariate techniques, while assuming only a limited knowledge of higher-level mathematics.

Using multivariate statistics, 5th ed.

Not so Tabachnick and Fidell's great book. Everything is clear and well set-out, with lots of real examples. Unlike many textbooks, it does not assume that you got your data out of a textbook, it shows how to analyze real data, how to check statistical assumptions and what to do about violations of those assumptions.

Barbara Tabachnick is Professor Emerita of Psychology at California State University, Northridge, and co-author with Linda Fidell of Using Multivariate Statistics and Experimental Designs Using ANOVA. She has published over 70 articles and technical reports and participated in over 50 professional presentations, many invited.

Tabachnick & Fidell, Using Multivariate Statistics, 6th ...

Tabachnick & Fidell (2007)'s sample size critiera for moderation is $N > 50 + 8k$, where k = all the predictors. Do all the predictors include the IVs + the moderators + interaction terms between the IVs & the moderators? For example: Does gender (male or female) moderate the relationship between stress and work output?

Tabachnick, B. G., & Fidell, L. S. (2007). Using Multivariate Statistics (5th ed.). San Francisco, CA: Pearson. has been cited by the following article: TITLE: Assessing the Correlation between Medical Students' Psychological Distress and Their Academic Performance in Makkah, Saudi Arabia

Tabachnick, B. G., & Fidell, L. S. (2007). Using ...

multicollinearity was unlikely to be a problem (see Tabachnick and Fidell, 2007). All predictor variables were statistically correlated with criminal behaviour which indicates that the data was suitably correlated with the dependent variable for examination through multiple linear regression to be reliably undertaken.

- Tabachnick says you are protected from this by tolerance testing (and excluding IVs with bad tolerance) when inputting additional predictors. However, these tolerance-in tests are pretty permissive and would allow multicollinear problems in spite of what Tabachnick says.
